T'BUGS (PAPERBACK)

Createspace Independent Publishing Platform, United States, 2017. Paperback. Condition: New. Language: English. Brand new Book. The Lab wasn't always a hulking ruin. It was state-of-the-art when Techno-Gadgets Inc. built it for a top-secret project. Someone in the head office had this brilliant idea: combine nanotechnology with genetic engineering to create a new generation of gadgets. The payoff could be huge. To ensure security, the Lab was built in the middle of a remote swamp. For years the Lab was a happy workplace. It was home to a team of human scientists, engineers and designers, who worked to create a bold new class of consumer products. The corporate marketing folks came up with the name Technobuggies. But we were simply known as "T'Bugs." This is our story. The designers imagined hands-free, butterfly-like cell phones. They envisioned friendly flying flashlights and adorable lightening bugs that could light up a child's bedroom. They drew plans for super intelligent devices that could walk and talk. As their sketches became reality, the first T'Bugs were as cute as cute could be. We had big eyes and adorable smiles. It was an expensive project, but it looked like a winner. Once investors saw the first T'Bug prototypes, they funded every nickel. The engineers invented long lasting batteries and tough carbon-fiber bodies to withstand rough play at the hands of young users. Our Nano-circuitry was indestructible and highly adaptable: we could learn. They also got some unexpected results. T'Bugs were suppose to have a never-quit-trying desire to serve. We ended up with a very stubborn will-to-survive. However, the scientists who made us special. They combined the DNA of insects with electronic gadgetry. They brought consumer products to life. Even better, we were smarter than insects. We had minds of our own. We were intended to be amusing...
